The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply is specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

Art Unit: 3725

#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5,6,9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Long (5,937,684). Long discloses a tool body (3), a tightening nut (10,11), three rollers (4,5,6) and means (2) for rotating the rollers about a workpiece to provide grooves on an outer surface of the workpiece. The tool body (3) has a relief hole (19). The rollers rotate on bushings (8,9) and are seated in cavities in the tool body. The rollers have raised threads on their outer surfaces. The tool body has a tapered portion (1).

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3,4,7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Long (5,937,684) in view of Helfman (4,942,752). Long does not disclose four rollers, a handle to rotate the rollers and hardened rollers. Helfman teaches four rollers (13,14,16,17) and a handle (26,27) to rotate the rollers. Helfman teaches in column 4,

Application/Control Number: 10/644,439

Art Unit: 3725

lines 14-16 that the rollers are hardened. It would have been obvious to one skilled in the art at the time of invention to provide Long with four rollers in order to ensure an even running of the rollers about the workpiece, it is conventional to harden rollers to provide a rolling tool that wears well. It would have been obvious to the skilled artisan at the time of invention to provide a well known handle as taught by Helfman to manually rotate the rollers and attach it to the means for rotation (socket) of Long.

### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication should be directed to Ed Tolan whose telephone number is 571-272-4525.
